DETAILED ACTION

1. This application is a continuation of SN 10/002,179. Claims 1-6 are in the case.
2. Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

The instant claims being drawn to the scope of "at least 5.0 grams per liter" or "5-100 gm per liter" lack antecedent basis and description from the specification, thus, is new matter. In the specification description of the $\omega 3$ fatty acid for the composition is about 1.0 gm to about 100 gm per liter, more preferably from about 5.0 gm to about 10.0 gm per liter (see p.5). No where the range of "at least 5.0 gm per liter" or "5-100 gm per liter" can be found. As set forth by the decision of *In re Smith* 173 USPQ 679, the changing of range of a defined parameter is NEW MATTER. Removal of all new matter is required.

3. Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,194,379. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims with more limited ranges of the components are fully encompassed by commonly owned claims. Especially, the issued claims when interpreted in light of the specification would be within the claimed ratio of 0.1-1 (see col. 12 lines 5-13).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1625

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
